'Fresh from the gardens'

A Time For Self Control

As Shakespeare once put it, "The times are out of joint." These are troublous days, and men's nerves are on edge, and little things that would be passed over lightly in good times are every day becoming the cause of quarrels. Because nerves are on edge, tempers are not under control even to the extent they usually are, and in the case of most people tempers are never controlled as they should be.

Today people will argue and dispute about almost anything, and lose their tempers over the most trivial matters which are of no importance whatever. The great Bard of Avon wrote: "Beware of entrance to a quarrel; but, being in, bear it that the opposed may beware of thee." Abraham Lincoln, however, said that while this advice was good, it was not the best, and he substituted: "Quarrel not at all. No man, resolved to make the most of himself, can spare time for personal contention. Still less can he afford to take the consequences, including the vitiation of his temper and the loss of self-control. Yield larger things to which you show no more than equal right; and yield lesser ones through clearly your own better. Give your path to a dog than be bitten by him in contesting for the right. Even killing the dog would not cure the bite."

This is not to say that a man should sacrifice so much as one important conviction, or yield his principles for the sake of peace or profit. There are times when a man should get mad, when we could feel nothing but contempt for him if he did not. But such occasions are few and far between. The trivial, inconsequential thing should never be the cause of dispute or outbreak of temper.

We are reminded of the three-word Latin motto above the doorway of the ancient chamber in the Guildhall in which the aldermen of London hold their court and which no one of them can fail to see: "Audi alteram partem." Hear the other side.

And in old England, with its long years of experience in handling human beings of all classes and degrees in all parts of the world, how much wiser than other nations is she in dealing with agitators. The Old Lady long ago learned that talk, like any other gas, is dangerous only when compressed. Younger countries, Canada included, has yet to learn that lesson. So we find in London, instead of attempting to suppress the Hyde Park orators, the British authorities supply police protection for them, let them say their say, and do not quarrel with them.

And what is the cause of most misunderstandings, leading to loss of temper and open quarrels? Is it not that in our self-organized state we are wasting our energies and increasing our blood pressure trying, over trivial things, to set somebody else right? Instead of accepting people for what they are, we are forever trying to mold their lives to our preconceived model, endeavouring to organize them. How many married couples live in a state of tension because one or both seek to make the other over. If once the idea could get broad that the real appeal of the sexes is the fact that they are not alike, what a great gain that would be! What applies to the sexes applies equally to races, creeds, and other established facts of life.

Let us stop trying to organize the lives of other people, and attend strictly to the task of organizing our own. Let us master the lesson that, after all, there are comparatively few issues in this world worth disputing over. It would, of course, be a sad day for the world if righteous indignation vanished from it. If men became so immersed in the scramble for profit and place of power that they could no longer get mad and no longer feel palpable wrongs and gross injustices. But the point is that too much of the world's anger is poured out in defence of pride or prejudice instead of conviction.

As one old Roman philosopher said: "Many have suffered for talking; none ever suffered for keeping silent." And, on another occasion, "We cannot be wrong in leaving other people's business alone."

Using Seed Cleaning Units

Saskatchewan Municipalities Taking Advantage Of Outfits Supplied

Several municipalities in Saskatchewan already have made applications to the Field Crop Branch of the Department of Agriculture for seed cleaning units as supplied by the Saskatchewan Government in co-operation with the Dominion Seed Branch. Under this scheme, the Governments furnish the machinery, the municipality being required to provide the motive power and the housing accommodation. All the outfits supplied to date have been of an itinerant nature, and may be transported from farm to farm during the seed cleaning period.

Exhausted From Asthma. Many who read these words know the horrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

A machine that tests in 24 hours how much a sample of wall paper will fade in two years is in operation at the Bureau of Standards, Washington.

Sheep Buried In Snow

Found Alive Eight Weeks After South African Storm

Hundreds of South Africans saw a fall of snow for the first time in their lives during a recent heavy storm on Table Mountain and other Cape ranges. While the present season is "winter" on this side of the equator, snow has rarely been seen this far south.

From the interior comes a story of how 18 sheep lived for eight weeks under an avalanche of snow in the Molten district.

Although completely hemmed in, they managed to keep alive by breathing through the melting snow and eating the grass on the floor of the aperture, as well as snow. When found they were little more than skeletons. They are now recovering.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem until I hit on this plan. I dropped the hems; and as the part that had been turned under was darker than the rest, I dyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package."

"I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when they see or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G.C. Lewis, Quebec.

Thirty-Five Years Enough

Missionary To Yukon Hands Over Work To Younger Men

Duties as a missionary in the frozen Yukon for 35 years have ended for Rev. W. D. Young.

Mr. Young only spent a few minutes in Calgary, but it was long enough for him to say that he had left the Yukon for ever. Now 73 years old, he handed to younger men the work of spreading the gospel in the distant north.

It was two years before the great Klondike gold rush of 1898 that Mr. Young went north, then 38 years old. Just what he will do now, he does not know, but it is likely he will go to Toronto after his stay in Winnipeg. He made two trips to civilization during the northern stay, which included 25 years at Herschel Island. The first was in 1902 and the second in 1910.

His home, before he went north as a missionary, was in Bruce County, Ontario, where he farmed.

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Kind Words Cost Nothing

There sometimes are excuses to be made for the men and women who are stingy with money, but not for those who are stingy with appreciation. Kind words cost nothing at all; yet some of us are as reluctant to make use of them as any old miser is to part with one of his cherished gold pieces.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation—

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is being carried off as it should be, Bowels need help—child, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt use of Castoria will urge stubborn little bowels to act. Then relaxed comfort and rest is yours! Genuine Castoria always has the name:

CASTORIA
CHILDREN CRY FOR IT

Boring Guest: That is a strange clock you have in the hall.
Host: Yes, we call it "The Guest."
Guest: Why is that?
Host: It won't go.

Canada Has Thousands Of Level Crossings

Removal Of All Impossible Says Hon. Frank Oliver

The Dominion at present has some 28,000 level crossings scattered along railways from coast to coast despite expenditure of \$15,180,000 over the past 21 years towards elimination and amelioration of this menace to traffic, according to Hon. Frank Oliver, advisory officer to the Board of Railway Commissioners for Canada, in a paper before the recent convention of the Canadian Good Roads Association at Lucerne-in-Quebec.

In 1930, a total of 341 railway crossing accidents in Canada took a toll of 115 lives and 475 injured. Mr. Oliver stated. Through the efforts of the Board of Railway Commissioners much had been done to improve railway crossing conditions Mr. Oliver continued.

Crossing accidents on provincial highways formed less than one-third of the total for 1930, the great majority of crossing fatalities occurring on country roads.

The annual government grant of \$200,000 to the Board for the railway crossing fund was inadequate, the speaker said, and it would be impossible to entirely remove all level crossings in the Dominion.

J. P. Bickell, registrar of motor vehicles of Ontario, said the death rate exceeded three persons a day on Canada's roads. The total of automobile fatalities in the year 1930 was 1,289 and the injured were approximately 40,000.

Project To Establish International Currency

Plan Is Suggested To Right World-Wide Uneasiness

A project to establish an international currency to fight world-wide uneasiness has been disclosed in the Swiss press.

The creation of such a currency would be based on a deposit of 11,000,000,000 in the world bank by the central banks of the various countries. France would deposit one-third of the amount and the United States the balance, under the plan. Certificates would be issued by the world bank and distributed among the depositors, each in the sum of 30 per cent. or 50 per cent. of their gold deposit. They would also draw coverage from money circulating in the various countries.

World bank quarters were confident the plan would assume concrete form in the near future. This is based on a belief that France and United States would call an international currency conference after Premier Laval's visit to Washington.

Lower Prices For Honey

Honey Prices In Ontario Lowest In 25 Years

Honey values in Ontario have reached the lowest point in 25 years, according to officials of the Ontario Honey Producers' Association, and while that is true, the flavour of this year's product is rated much better than the average year. Last year's crop in round figures in Ontario was about 13,000,000 pounds and this year there is a 60 per cent. crop, or about 7,500,000 pounds.

There has been a good demand from countries like Holland for buckwheat honey at four to six cents a pound and producers hope for better prices than those now prevailing, under which they get only about 5 to 6 cents a pound. Last year's prices were easily 2 cents a pound, on the average, above this year's price.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Painty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Trade and Commerce

Oregon has a buy-at-home campaign and so has the state of Washington. Each is cancelling contracts which have been made across the border. Keep it up. Buy only in your own state, buy only in your own home town, buy only on your own side of the street, buy only from a member of your own family and thus get rich. The whole idea of trade and commerce must, 't seems, be old-fashioned and foolish.—Toronto Star.

No Longer a Bugbear

Britain's Departure From Gold Standard Not Likely To Harm Anybody

The United States owns nearly half the gold supply of the world. At the beginning of the present month, United States-owned gold amounted to \$4,983,000,000, a new high record. Yet in the Republic at this very moment, some millions of men, women and children are fearfully wondering how they are going to keep warm and fed this coming winter.

Perhaps the position of the United States has little real relation to the gold standard in Britain, or its departure from it. Yet existing world realities have knitted so many ancient and cherished theories into a cocked hat it will be surprising if what has been done in Britain visits much harm upon anybody. Currency changes, most certainly, long ago ceased to be a bugbear.—Ottawa Journal.

Cutworm Damage

Survey Will Be Made In Several Areas Near Saskatoon

A survey of cutworm damage will be undertaken immediately by the Entomological Branch of the Dominion Department of Agriculture.

The object of this study is to secure accurate information with respect to the amount of damage done by cutworms. For this purpose several areas in the vicinity of Saskatoon, Saskatchewan, have been chosen.

It is also expected that as a result of this survey information which will show the relationship of farm practices and farm management to cutworm damage will be obtained and better methods of control may be developed.

City Covers Big Acreage

Regina is one of the largest cities in Canada. It covers 8,408 acres, more than twice as big as many eastern cities of similar or even larger population. Within the confines of Regina are more than 500 acres of civic parks, nearly 100 acres of exhibition grounds, besides a great deal of vacant property. Regina could comfortably accommodate twice its present population without extending the boundaries.

Mail Service Suspended

During the season of closed navigation on the Yukon River, which extends approximately from October 1 to May 31, parcel post service in the Yukon will be suspended, except for the post offices of Champagne, Carcross and White Horse, according to post office bulletins.

Steel owes much of its usefulness to the presence of carbon, thus insuring hardness.

Canada Keeps Gold Standard

Premier Bennett Says No Change Is Contemplated

Canada retains the gold standard, and it is not proposed to abandon it. This, in effect, is the statement of Premier R. B. Bennett. Persistent rumour that the Dominion proposed to abandon the gold standard was drawn to the attention of the Prime Minister. His answer was emphatic. The Government had not changed the position taken when news of Great Britain's departure from the gold standard was flashed across the ocean.

"Canada has not altered the position taken when the announcement was made that England had departed from the gold standard, nor do we contemplate so doing," the Prime Minister declared. "We have appealed and not in vain, to Canadians to conserve our gold supply to meet whatever strain may be placed upon our resources by reason of our foreign commitments, which are payable in gold and will be honoured accordingly."

Going Back To Primitive

Hunters In B.C. Are Using Bow and Arrow For Big Game

Near Longworth, B.C., sixty miles east of Prince George, big game is being hunted with bow and arrow, by F. Nagler, of Milwaukee, Wis., an archer of national repute. William W. Tefft, of Jackson, Mich., who has tracked animals in many countries of the world, is accompanying Mr. Nagler.

The expedition, which comprises five members, left Longworth a short time ago. Other members of the novel hunt are Leslie Hale, Arthur Read, of Longworth, and R. A. McLeod, of Dome Creek.

A mysterious submerged valley has been discovered in the North Sea between England and Europe.

"SICK HEADACHE?"

It is not necessary to give in to headaches. It is just a bit old-fashioned! The modern woman who feels a headache coming on at any time, takes some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your engagements. Headaches, systemic pains, come at inconvenient times. So do colds. You can end them before they're fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse always to insure your comfort while shopping; your evening's pleasure at the theatre. Those little nagging aches that bring a case of "nerves" by day are ended in a jiffy. Pains that once kept people home are forgotten half an hour after taking Aspirin! You'll find these tablets always help. In every

package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, sciatica, and even rheumatism. The tablets stamped Bayer won't fail you, and can't harm you. They don't depress the heart. They don't upset the stomach. So take them whenever you need them, and take enough to end the pain. Aspirin is made in Canada.

Made in Canada

Little Possibility That Gold Mining Will Suffer Through Nations Dropping Gold Standard

"The possibility that the gold mining industry will suffer by reason of the tumultuous changes that have taken place in the world's financial relationships, is extremely remote," declared Hon. Charles McCrear, Ontario Minister of Mines, in a statement at Toronto.

"Instead of gold bullion becoming less valuable, it would appear to be more desirable than ever," the Minister's statement continued. "Great Britain and other countries which have taken action which is described as going off the gold standard, have actually taken steps to prevent further loss of the precious metal and are endeavouring to restore their former reserves. There seems little danger of United States, with five billion dollars' worth, or France, with another huge total, doing, or permitting anything which would lessen the worth of their enormous holdings, much as sanctioning any scheme of demonetization.

"Nor is it likely that the British Empire, which produces three-quarters of the world's gold, and possesses billions of dollars worth of ore, will propose anything which will diminish the value of these great resources.

"Both United States and Great Britain have been off the gold standard in previous times of stress, yet gold has never lost its desirability nor its usefulness. There is nothing in the situation which should discourage prospectors in their search for new discoveries, nor cause gold miners to restrict their activities.

"On the contrary, we will find that both activities will be accelerated. The exchange premium represents just so much extra profit for the gold mines and Ottawa authorities agree that the mines are entitled to any profit they could by selling their gold outside Canada, just as are the producers of paper, wheat, or any other exportable material."

Dark Skin Resists Sunlight

Does Not Let Beneficial Rays Through Physician Finds

The darker the colour of the skin the less it is affected by sunlight. Tests with half-breed and full-blooded Indians show convincingly that the greater the amount of black and red in untanned skin the less is the change in colour from exposure. Dr. Forest Clements of the University of Oklahoma, reports in the Journal of Physical Anthropology. The heavier pigment, he holds, serves as a partial insulation from sun rays. This may explain, he holds, why negro and Italian children have been found more subject to rickets than those of lighter races even when the diet and environment are essentially the same. The pigment produced by exposure probably differs from that in unexposed skin and forms a storehouse for the anti-rachitic vitamin. Darker skins do not let the beneficial rays through. Dr. Clements found, however, that red skin changes less than black from exposure.

Silver Mining in Canada

Silver mining in Canada is not a distinct mining industry as silver generally occurs with other metals; with lead and zinc; with cobalt, nickel and arsenic; with lode and placer gold; in copper-gold ores and in nickel-copper ores. Silver in lead and zinc ores and in cobalt-nickel-arsenic ores is usually the predominant factor in determining the marketability of such ores.

As an expression of thanks of the British navy for the wonderful reception accorded British bluejackets at Kiel, Germany, a hundred Kiel school children were given a gala day on the cruiser "Norfolk."

An authority on table etiquette says: "Never break your crackers or roll in your soup." Well, who ever really wanted to roll in their soup anyway?

"Has the professor had his breakfast?"
"I don't know."
"Ask him."
"I have asked him, and he doesn't know."—Wahre Jakob, Berlin.

Women Are Launching New Business Ventures

Varied Occupations Featured At Annual Exposition In New York

Everything from pie baking to international politics was featured at the tenth annual Exposition of Women's Arts and Industries, held in New York. Despite the depression, women are continuing to go into new fields and to launch new business ventures, Mrs. Oliver Harriman, chairman of the exposition, said.

Mrs. Frederick Fox, wife of a physician, adds to the lengthening list of vocations for women—that of milk raising. She started her milk farm last season at the country place in Westchester County, N.Y., to encourage milk raising among farm women desiring to add to their income.

Mrs. Francis D. Gilbert of Westfield, N.J., has a rabbit farm and already is doing a large business raising these animals whose skins are so widely used for jacket trimming of women's apparel.

Sixty-five women inventors are showing models of their designs at a special exhibition of inventions patented but not yet marketed. Beauty culture for business women, music, foreign languages, city sanitation, birth control, disarmament, temperance, anti-prohibition and the homelier arts of household management and cookery were on the programme for discussions at the convention.

WHAT NEW YORK IS WEARING

Illustrated Dressmaking Lesson Furnished With Every Pattern Here's a snappy new model that is exceedingly kind to matrons. It is designed to give the figure height, and it does it beautifully. The bodice has the cross-over closure that detracts from undue breadth. A partial belt crosses the back, leaving the front free to narrow the waistline. The bias band, lengthened on one side, does away with hip bulk.

It's a marvelous dress for mid-summer and early fall wear fashioned of supple diagonal woolen mixture. Crepe silk, crepe satin and crepe marocain also suitable.

Style No. 3205 may be had in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 39-inch material with 3/4 yard of 39-inch contrasting.

Pattern price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Differing Uses Of The Term Bacon

"Bacon" is a term that is open to several meanings. It is often used in a general way to describe practically all the cured products of a hog and that is the way in which it may be said to be used in the Canadian export trade of Wiltshire-cut sides. Then again the term "bacon" is very strictly limited, especially in the domestic trades of Canada and the United States, to that part of the cured product which comes from the belly and occasionally the back of the carcass. There is frequently much confusion in the discussions of our Canadian trade owing to difference in the application of the word "bacon." The accompanying chart has been prepared to make clear the manner in which the terms are used in the respective cuts, according as one is dealing with the export or the domestic section of the industry.

Finishing Hogs

Practice Of Selling Light Weight Unfinished Hogs Very Unprofitable

In a review of the hog market situation as it exists at the present time A. A. MacMillan, Chief of the Sheep and Swine Division, Dominion Live Stock Branch, states that there is no justification for the practice which has been too general this season of trying to beat the market by selling off light-weight unfinished hogs to gain a few cents per pound at current prices. As he sees it, the principal effect of such practices has been to demoralize the market and force prices much below what they otherwise might be.

With Canadian hog prices drastically realigned both to suit domestic conditions and export market prices the common sense practice to use at the present time, according to Mr. MacMillan, is to finish hogs up to the proper market weight, around 200 pounds. This he believes is the one effective way in which to develop a "steady" hog market, to regularize marketings, and at the same time to improve quality.

Congratulations For Canadian Government

Message Received From Hon. J. H. Thomas On Arrival Of Grain Boat

Rt. Hon. J. H. Thomas, secretary of state for Dominion Affairs, sent the following cable to Prime Minister R. B. Bennett on the occasion of the arrival of the first steamer with grain from western Canada to this country by the Hudson Bay route, His Majesty's Government of the United Kingdom wish to convey to His Majesty's Government in Canada hearty congratulations on the successful inauguration of this great Canadian enterprise and express the hope that it may lead to increased trade and prosperity for all concerned."

"On the occasion of the safe arrival in London of the "Farnworth," bringing the first direct shipment from western Canada to this country by the Hudson Bay route, His Majesty's Government of the United Kingdom wish to convey to His Majesty's Government in Canada hearty congratulations on the successful inauguration of this great Canadian enterprise and express the hope that it may lead to increased trade and prosperity for all concerned."

EXPERTS MEET AT ROUND TABLE CONFERENCE

The press photographer shot this picture as the Indian and British delegates to the Round Table Conference left St. James' Palace, London, England, following the Federal Structure Meeting. The gentlemen on the left is the Maharajah of Burdwan, while on the right is Lord Reading, British Foreign Minister, and former Viceroy of India.

Freight Rate Concessions And Other Forms Of Assistance In Connection With Feeder Cattle

Invaluable During Famine

Potatoes Cultivated By Missionaries Save Lives Of Millions Of Chinese

Twenty-five years ago a handful of potatoes was sent from the United States to China. The missionaries propagated them in their remote corner of China along the Tibet border and during the last three years of famine descendants of the original potatoes have saved the lives of more than a million Chinese.

When the first Americans and Europeans penetrated the Kansu Province and established mission stations in Taichow (Old City), some 40 years ago, they found a native Chinese potato which was small, poor, and had a very low food value. The natives of the district, with little regard for the future, had been in the habit each year of eating the best of the crop and saving the poorest potatoes for seed.

Four Early Rose potatoes were sent from Tennessee, and these were planted in 1897, two in Taichow, and two in Minchow. They grew very well and produced many tubers of fine quality in Chinese soil.

In a few years the new variety spread to several counties of the province, which had a total population of 10,000,000 people. But the Boxer Rebellion resulted in a recall of all the Christians from the district, and while they were away the Chinese fell back into their old habit of eating all the best, and also of allowing the new variety to become mixed with the diseased older type of potato.

The potatoes had become so poor when missionaries were again allowed in the country that they had to re-introduce them. The variety chosen was the Green Mountain which was planted in 1903.

The experience of Chinese planters with the other variety helped to speed the distribution of the Green Mountain tubers, which quickly supplanted both the native and the Early Rose types.

In the three years, famine since 1928, one of the worst famines the world has ever known, almost half the population of Kansu, and also of the Province of Shensi, to the east, have died. But where the Green Mountain potato was cultivated the larger part of the population has been able to subsist. It has been estimated that a million people have been living by eating these potatoes.

Old Harvest Ceremonies

Strange Practices In West Of England Half Century Ago

Many old customs connected with the gathering in of the harvest have been dead these fifty years and more. When the grain was ready for cutting in the olden days in the West of England, all kinds of strange practices were resorted to in order to scare the witches away, and a belief existed that the last wisp of corn in the harvest field was inhabited by the sacred horse. A horse representing the grain god would be eaten with special rites by the reapers at the harvest supper. There was also "crying the mare," the reapers tying together the tops of the last standing blades of corn in a field, "the mare," and making this a target for their sickles. The man who cut the mare down had the prize, and the "mare" would be sent in by a fleet-footed messenger to the next farmer who had not reaped his corn, emblem at once of a brag and a taunt.

Why Burn Straw Stacks

Straw Can Easily Be Converted Into a Valuable Fertilizer

When with the use of suitable chemicals they can be converted into manure the question "Why burn straw stacks?" is really pertinent. Straw is worth something more than as a bedding material, and not the least valuable is its use for the making of artificial manure. The use of 100 pounds of ammonium sulphate and 100 pounds of lime to each ton of straw and this thoroughly soaked with water produces a manure of distinct fertilizer value. From three to six months are required for the organic changes to become effective and the resultant substance has much of the appearance and practically the same value, as barnyard manure. — Department of Agriculture, Ottawa.

Among the birds that are believed to live to see 100 years or more are the falcon, golden eagle, parrot, and raven.

Open flames will be employed in cooking on the new airship, "Akron."

In order to clear up any possible misunderstanding in relation to policies now in effect, Hon. Robert Weir, Minister of Agriculture, has authorized a statement with reference to freight-rate concessions or other forms of assistance to farmers in eastern and western Canada on purchases of feeder cattle.

Assistance to the movement of cattle between local points in western Canada is a 50 per cent. reduction in normal carload freight rates on feeder cattle. This reduction has been authorized by the Canadian National Railways and the Canadian Pacific Railway Company to facilitate the direct purchase of cattle as between producer and feeder for fattening and shipment.

The rate decrease is not available on purchases from stock yards. When cattle shipped to the feeder are fattened and ready for shipment, the normal freight rates will apply to all points of destination in Canada.

With respect to the movement of western cattle fed for export in eastern Canada, this policy allows a reduction of 50 per cent. in normal freight rates on cattle shipped from any point east of Fort William to the seaboard for export. Provided such cattle were purchased in western Canada after June 30, 1931. This policy is in operation until December 30, 1931.

Under the policy of assistance to Canadian cattle feeders in purchasing western cattle, the prospective purchaser in eastern Canada is entitled to one-way travelling expenses. This includes railway fare, berth and reasonable living allowance en route, to purchase carload shipments from western stock yards, western feeder shows, or in the case of purchases from ranches, to the stock yards nearest thereto.

The prospective feeder residing in western Canada is entitled to the foregoing privileges on carloads of feeder cattle purchased at his nearest stockyards, or at a feeder show in the western provinces.

The British Columbia feeder is required to make his purchases of cattle under this policy at western stockyards at which a feeder sale is being held, or direct from ranches in British Columbia.

In all cases, cattle purchased under this policy of assistance to Canadian cattle feeders in purchasing western cattle are subject to regular freight rates, and the policy is in effect for five months commencing August, 1931.

All the policies mentioned relate specifically to the purchase of feeder stock. In addition to these, there are two other policies relating to the movement of females for breeding purposes.

A freight policy is in effect on approved heifers. Purchasers of heifers for breeding purposes may be made in any central stockyards in western Canada for shipment to any country point west of Port William. Twenty-five per cent. of the rate is rebateable by the railway company, and the other 75 per cent. is rebateable by the Dominion Livestock Branch.

A transportation policy on approved purebred females of beef or dairy breeds is in operation. This policy allows for free freight on carloads of approved purebred females from any railway point of loading in Canada, including points in the prairie provinces, to any other railway point in the prairie provinces, after having passed tuberculosis and blood tests.

B.C. Placer Mining

There has been a revival of activity in placer mining in British Columbia lately and prospecting continues active throughout the likely sections. In the Lardeau River a tractor and dredge is working along the gravel bed for gold deposits.

Sixty South Wales colliery ponies shown at a London horse show recently were insured for nearly \$15,000.

True courtesy can neither be misplaced nor replaced.

MUNICIPAL DISTRICT OF KINSELLA, No. 424**

I have been instructed by the Council to have inserted in this newspaper a short explanation of the Tax Consolidation Act.

The owner of any farm land who had arrears of taxes on January 1st, 1931, and which arrears are still in arrears, may make application to the Secretary of District to have these taxes consolidated, which means that the whole amount of the arrears together with 7 per cent. interest will be divided into five equal payments, the first payment, together with the current years taxes to be paid to the Secretary on or before 15th of December, 1931, the second payment December 1932 and so on.

If any farm land owner enters into this agreement with the Council, then any proceedings which may have been started under the Tax Recovery Act will be stopped.

But if the land owner after having entered into this agreement fails to keep his part of the contract, then the proceedings which had been started will be in force again.

If there is anything in this that you do not understand see your Councillor or come and see me and I will be glad to explain everything to you. All applications to enter into this agreement must be made before December 16th, 1931.

BLAKE H. GREEN, Sec.-Treas.
Municipal District of Kinsella, No. 424.

**Your Needs In
Printing****WHEN BUSINESS IS QUIET**

When there is a quiet time as at present in usual business, a good chance is afforded merchants and others to check up their requirements for the year, place orders and have them completed in readiness for the hurry up periods. This is especially true of your printing and we venture to draw your attention to our well equipped plant.

Our stock of Paper, Envelopes, Cards, Cardboards, and all other items required in this business is complete.

DATE IS NAMED**FOR GRAIN SHOW**

Regina, Oct. 17th.—The World's Grain Exhibition and Conference will be held in Regina July 24th to August 5th, 1933.

At a meeting of the executive and finance committee of the forthcoming international show, held in Regina Friday, these dates were decided on. The committee will at once proceed with plans for the carrying out of the exhibition and conference in 1933.

The government of Canada will be asked by the executive committee to notify governments of all countries of the postponement and those countries will be requested to allow their acceptance to stand for 1933.

The committee passed a resolution recommending that the awards committee include a class in the prize list for such wheat as the white variety of Australia.

CREAM GRADING**CHANGE MOOTED**

Whether the cream grading system in use in the province for several years shall be continued or changed over to some other plan was under discussion Tuesday at a meeting in the parliament buildings of some 20 representatives of the butter manufacturers and producers with officials of the department of agriculture.

J. W. Carlyle, Calgary chairman of the manufacturers' section; J. J. Skalkitzky, Winnipeg, president of the butter makers' association; and Dan Markenberg, Markerville, president of the provincial dairymen's association, were present.

Hon. George Hoadley promised to give the question careful consideration and to announce a decision at an early date.

**WHEAT YIELD IN
ALBERTA IS SET**

AT 17.5 BUSHELS

Edmonton, Oct. 19th.—With threshing operations completed in the south and nearing completion in central and northern districts, Alberta seems certain to harvest the average of 17.5 bushels of wheat to the acre, according to summary issued Saturday.

Grain threshed earlier in the season contained a considerable portion which graded tough, but the majority being threshed now is receiving straight grades of numbers 1 and 2 Northern, the report shows. If present weather conditions continue, the amount of tough grain in central and northern districts will be relatively small.

Threshing is proceeding rapidly, with the amount completed varying from 80 per cent in Peace River district, 75 per cent in central districts to 100 per cent in the south.

Special Notice.

Feeling sure there are any number of our own people who have more potatoes and vegetables they can store, also that so many of our own people to the south of us are without the bare necessities of life and no means of securing them; feeling that our own people here would much prefer to see these vegetables go to people who are in actual need of them, rather than go to waste, the Women's Institute are appealing to you for your help, that they may load a car of potatoes and vegetables, at a very early date, such as next week, to send to the stricken areas in our own province. Please get in touch with Mrs. Fisher, Mrs. Schoner, Mrs. Masson, Mrs. McFarland or Mrs. Knudson at the Post Office.

We feel the community has always been behind us in our efforts in the past and we feel sure this appeal for help where it is so badly needed will meet with tremendous response.

Thank you.
We have arranged to store these vegetables in Mr. Dick Larsen's implement house.

The Floral Assets of the C.P.R.

Upper—Gardens and fountain at Kenora Station.
Lower—Woodstock Station grounds.

Flowers are among the assets of the Canadian Pacific Railway. It is the policy of the Company to establish permanent flower gardens at every station along the long line of track stretched across the continent.

In the very early days of the railroad the pioneers were too busy attending to the task of opening up new roads to give much attention to flowers, yet even back in the early days one of the C. P. R. employees produced a few varieties of flower seeds in his own plot and distributed them amongst his friends at some of the stations with the object of starting flower gardens along the line. This took place over 30 years ago, and to-day the Company spends a considerable amount producing and distributing seeds and shrubs of all kinds to station agents along the lines. The Company maintains a floral department with headquarters at the Windsor Street Station in Montreal.

In carrying out this work a great number of trees, seeds and perennial plants are used annually. Suitable trees such as ash, elm and maple, are supplied, and shrubbery such as honey-suckle, lilac, barberry, elder, spirea, weigela and many other varieties together with a long list of bed flowers. Vines are also supplied to cover buildings and fences surrounding stations. For this purpose Virginia creepers and Japanese ivy are considered best.

During the past thirty years the encouraging influ-

ence of the C. P. R. gardens has materially assisted in the inauguration of floral societies all over the country, many of the officials of the Company being members of these societies. It is pleasing to remember that the work in connection with the gardens is creation, for it is carried out mostly in their own time, through their enthusiasm in beautifying the stations of which they are in charge. The C. P. R. recognizes this effort and much interest is aroused by the annual competitions on both eastern and western lines of the Company for the finest station gardens. Extensive layouts do not enter into the contest but the gardens that have shown the most improvement during the year are the ones that carry off the honors. Representative from the floral department tour the lines each year, sizing up the gardens and deciding the winner. Substantial money prizes are awarded each year.

The floral department of the Canadian Pacific is constantly in touch with horticultural institutions, including agricultural colleges and societies, so that no stone is left unturned to keep up to the very latest standard.

VIKING

The wells in the Viking gas field owned by the Northwestern Utilities were tested this week for pressure and volume. In the party that visited the field and assisted in the tests were, Mr. Calder, chief geologist for the government; Mr. C. Dingman, and Mr. Owens, also representing the government; Messrs. Mills and Dunn of the Hudson Bay-Mariand Co., Julian Garrett, manager of the Northwestern Utilities, and C. H. Spencer, general superintendent. The test of the wells proved very satisfactory, and consumers may feel assured that the gas supply is adequate.

The chairman of the Board of Grain Commissioners of Canada, Mr. E. B. Ramsay, and the assistant grain commissioner for Alberta, Mr. W. H. Blachford, will be in Viking on Tuesday, October 27th for the purpose of addressing a public meeting in the Elks hall on the subject of Grain Handling. The meeting will open at 8.15 P. M. These gentlemen will be here for the purpose of giving all information possible on the subject of grain handling and everybody is invited to attend the meeting and get first hand information on a very timely subject.

October 24th, 26th, 27th and 28th, will be red letter days in Bruce. The Canadian Chautauques are presenting a four day program of exceptional high merit, starting out with a face comedy, "Her Temporary Husband" the first evening. On the second day in the afternoon the Herbert Petrie Company will give a musical, followed by a lecture "Under the Southern Cross" by Constance Neville Johns. The evening program will be largely musical, given by the same company.

The third day will be featured by a presentation by the Lucille Elmore Company, artists and entertainers. And also a lecture by Sam Grathwell, well known lecturer and entertainer. The fourth day program will be given by Sue Hastings Marionettes in the afternoon, and as a final to the chautauqua a comedy drama will be presented by the Havelock players. Season tickets are two dollars for adults, and children's tickets \$1.00. A long list of Bruce citizens are sponsoring chautauqua, and will appreciate any support given them in their undertaking. Plan to at least take in one or more of the programs.

Threshing in the order of the day in all parts of the district, and yields up as high as 50 bushels of wheat to the acre have been reported. The weather looked threatening Monday evening, but a heavy frost Monday night cleared the situation. This is about the first lucky break this district has had this season. Every machine in the district is running full capacity and if good weather prevails, the crop should be threshed in two weeks.

Kenneth Rowe, of Tofield, has accepted a position as mechanic at the McAthey & Sons garage. Mr. Kenneth comes highly recommended as a workman and has a wide experience in garage work of all kinds. He and Mrs. Rowe and family have moved into the residence recently vacated by the J. McCafferty family.

Dr. and Mrs. G. M. Little, and children, Shauna, Meldrum, and Jackie, of Red Deer, were week end guests at the home of Mr. and Mrs. C. G. Purvis. The doctor enjoyed a duck hunt with some of his old cronies while here who were glad to see him again. He is now in charge of the provincial health unit with headquarters at Red Deer.

The delegates to the W. C. T. U. convention held at Edmonton last week were Mrs. H. M. Hilliker, Mrs. H. B. Collier, Mrs. Hyslop, Mrs. C. G. McLaren, and Miss Marjorie Barker who represented the Y. W. C. T. U. Many important resolutions were discussed bearing on the question of temperance and prohibition.

One of the substantial additions to the business section of our town is the Dupre Service Garage, owned and operated by a C. A. Dupre. The building is a very neat structure, stucco finished, nicely trimmed and decorated and well lighted. In another column you will find an advertisement setting forth the products this garage is handling and the service features connected therewith.

The Viking Women's Institute held their regularly monthly meeting on Thursday, October 15th. Owing to the busy season there was a small attendance. We wish to thank Fr. O'Neill for his most interesting and instructive address.

D. M. Rae, inspector for the neglected children's department, died at his home in Edmonton last Friday. Mr. Rae is quite well known in this district, having made regular calls here during the past few years in the course of his duties.

J. T. Davies, of Melville, Sask., superintendent of the Reliance Lumber Co., paid a call to the local yard last week operated by J. J. Brown.

The Elks hall company will sponsor another dance in the Elks hall on Monday, November 9th. Prepare for another good time.

ARCHDEACON BURGETT ELECTED AS BISHOP EDMONTON DIOCESE

The new bishop of the Edmonton diocese of the Anglican church of Canada is Archdeacon Burgett, who was elected by a decisive majority of both clerical and lay delegates in Edmonton last week. Archdeacon Burgett has spent the past nine years in Alberta in the work of the church as Diocesan Missioner and Archdeacon of Edmonton north. Ven. Archdeacon Howcroft is archdeacon of Edmonton south. Bishop Burgett is very well known throughout this district and the honor which has been bestowed upon him will be the source of much pleasure to everyone who knew him.

COMPLETE RADIO OUTFIT PRESENTED TO STANLEY FONGER

Under the direction of Sandy McDonald a number of citizens of the town and district subscribed a sum of money sufficient to purchase a Radio complete with tubes, batteries and aerial which was presented to Stanley Fonger to give him some pleasure and recreation through the winter months. Stanley wishes to acknowledge the gift and sincerely thanks those friends who were instrumental in making the gift.

BONUS PAID ON WHEAT SENT TO GRIST MILL

D. MacEarchen, of Wetaskiwin, president of the Western Canadian Millers' Association, has been advised by W. H. Blachford, assistant grain commissioner, that the Board of Grain Commissioners have decided that the wheat bonus is payable on wheat delivered to a licensee of the board for gristing purposes.

Also that it will be necessary for the operators of small mills to become licensed under the board so that they may be in a position to distribute the wheat bonus.

This will mean that the farmer who has his wheat gristed at the local mill will receive the wheat bonus on the wheat he has milled into flour as well as on the wheat he sells to the local elevator.

GEESSE AND DUCKS ARE FLYING SOUTH

Heading for the southern coastal waters and swamp areas, the far northern wild geese, cranes and ducks are now at the height of their fall migration flight, with thousands of birds drifting down daily from the hinterlands.

The main flyway of the "honkers" and "waxies" lies over the eastern half of Alberta and the western portion of Saskatchewan, while ducks traverse a much broader route on their way south. Alberta grain fields and lakes are enticing to the birds and the majority of them stop for a week or 10 days to rest and feed here before continuing the long flight.

HOLDEN BOY DIES UNDER GRAIN WAGON

His skull crushed by a grain wagon while playing around a threshing rig at work on his father's farm, near Holden, John Michalovsky, died within a few minutes of the accident, on Sunday.

Dr. S. J. Ferrell, of Holden, notified Coroner Dr. G. C. Haworth, of Viking, and an investigation was made by the coroner and an A. P. P. officer, at which it was determined that the tragedy was an accident. The father said that the boy had been playing near the wagon, which was later backed up and the boy was then found lying on the ground with scratches on his face. A post-mortem examination showed a fracture at the base of the skull. No inquest will be held.

NO UNEMPLOYMENT IN TERRITORIES

A country, covering two-fifths of the total area of Canada, that is free of poverty and unemployment, without a suggestion of communism, is found in the "Territories" according to Col. J. K. Cornwall, veteran trader of the Arctic Circle and the North West Territories, who recently travelled over Canadian National Railways to the East, following his return to civilization from the district of Great Bear Lake, where new mining developments have created great interest during the past summer.

In this land, there are about 1,000 white men, including traders, trappers, prospectors, rivermen and fishermen, and about 5,000 Indians and Eskimos. Doctors are the only professional men and, if they were subsidized by the government to give medical attention to the Indians, they would be the poorest men in the country, because health prevails everywhere, Col. Cornwall told newspapermen.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

The Wastebasket

"I am a fool to fall in love with you, said a local fellow to a Bruce girl. "That makes it unanimous," the girl replied.

"So this is the end of our engagement," said a local girl to her Jarrow fellow. "It may be for you," he replied, "but not for me; it will take me a year to pay the bills."

A missing Holden girl is thought to be the victim of either love or somnambulism. In either case, says a careful observer, she'll wake up.

"What are you crying about now?" asked an old lady who saw a sobbing child on the street the other day. "My brudder dreamed he had a whole pie to eat, and I didn't," was the astonishing reply.

"He raises his hat very gracefully to me every time he meets me," remarked a Kinsella girl to her father while discussing her new fellow there. "Yes, but he doesn't seem to be able to raise the price of the hat as gracefully," replied the old man who is in business there.

It's a mystery. A careful observer, now that women smoke what has become of the curls she was afraid would be ruined when her husband smoked?

"But how can I think just what to do?" asked a lady here while learning to drive a car. "That's easy. Just imagine your husband was driving," replied the instructor.

"Why don't you take a vacation," asked a Jarrow man's wife of her husband. "Couldn't the firm do without you for a week?" "Quite easily," he replied, "and I don't want them to find it out."

Heard at the schoolhouse: Teacher: "Don't you know where our coffee comes from?" Kid: "Well, we usually borrow ours from the neighbors."

He: I hear your husband was killed in a feud. She: Oh, no. He never rode in a cheap car.

There are two kinds of men who do not understand women — the married men and the single men.

Young folks in this community report that advice on kissing is very discouraging. It all tells them not to do it.

A Californian man, suing his wife for divorce after less than two years of marriage, says that she is "sullen, mean, irritable, morbid, disagreeable, nasty, gruesome, cool, bitter, jealous, heckling, picaunish, loathsome, insulting, brazen, miserly, gluttonous, contemptuous, inattentive, incivil and inconsiderate." Otherwise the old girl is all right.

CAR FOR EVERY EIGHT CANADIANS

Ottawa has been doing some calculating, and the statisticians have come to the conclusion that if every automobile in Canada would hold eight people then everybody in the Dominion could ride at once. In other words, there were, 1,239,888 motor vehicles registered at the end of last year, or one for every eight persons, as compared with one for every 8.2 persons the previous year. Ontario led registrations with 554,089 cars, and also led in the per capita column, with one for every 6.9 persons in the province. Ontario may have the cars, but Saskatchewan has the roads. The Ottawa officials discovered that there were 394,372 miles of highway open for traffic in the Dominion, and that Saskatchewan led with 154,859 miles. Alberta was next with 62,246, and Ontario was third with 52,270 miles. It is thus very noticeable that the province with the greatest number of cars is far from having the greatest mileage of roads on which to use them. Which circumstance prompted Hon. Leopold M. Carmichael, Minister of Highway for Ontario, to say in a recent address that the density of traffic in Ontario was becoming rather serious. He illustrated his point with the remark that if all the motor vehicles in average daily use in Ontario were placed end to end they would stretch a distance of 1100 miles.

CLEM LOUGHLIN SIGNS NEW DEFENCE PLAYER

Toronto, Ont., Oct. 17th. — Art Townsend, brawny Regina hockey player, will be on the line-up of the London international league team this winter. When Clem Loughlin, manager of the local club, arrived in town today from his farm at Viking, Alberta, he brought with him Townsend's signed contract. The Regina man is a defence player.

THOS. EDISON NOTED INVENTOR DIED SUNDAY

West Orange, N.J., Oct. 19.—Thomas A. Edison died at 3.24 a.m. Sunday. His wife, six children, his personal physician and two nurses were at the bedside when the end came.

So many and wonderful were the inventions of Edison that even the time can truly estimate the worth of the inventions conceived by his fertile genius and the gifts to humanity and civilization brought into being by

bon telephone transmitter, the system for distribution of electric light and power, the phonograph, the incandescent electric light, the multiplex telegraphs, the dynamo with armature of low resistance, the motion picture. While the world recognizes Edison among its few foremost citizens, only the time can truly estimate the worth of the inventions conceived by his fertile genius and the gifts to humanity and civilization brought into being by

AS SLIM AS AT 20

Still Fit and Active at 55

"I have been taking the small dose of Kruschen Salts every morning for the last three years. I wouldn't be without them in the house. I used to suffer with constipation and piles, but am never troubled in that way now. I am 55 years, and as slim as when I was 20. I have to work very hard, as I have my family and an invalid father to attend to, and I always say it's the Kruschen that keeps me in it."—M. S.

"There's nothing like hard work and activity for keeping superfluous fat away. The trouble with most folks is finding the necessary energy. That is where Kruschen comes in."

"After you have had your daily supply of Kruschen every morning for a couple of weeks you'll get what is known the world over as 'That Kruschen Feeling.'"

"The urge for activity will fill your entire being—you'll not be content to sit in the old arm chair after your day's work is done."

"You'll feel the spirit of youth within you—what a joyous feeling—you'll want to take long walks, play games, and your work will come to be a hardship—it will become a pleasure."

WORLD HAPPENINGS BRIEFLY TOLD

Vessels being built in Italy total 171, which is 29 more than a year ago.

Building of the University of Manitoba's science building will be resumed with the government in relief matters.

E. D. T. Chambers, 79, dean of Quebec journalists and leading authority on natural history in the Province of Quebec, is dead.

Hall losses in Alberta during the past season totalled \$154,000 on a risk of \$1,596,000, according to a statement issued by the Provincial Hall Insurance Board.

Unable to sell its lumber otherwise, a sawmill company in Singapore, Straits Settlements, used it to build 176 houses, which now are being offered for sale.

The first shipment over the new extension of the Temiskaming Northern Ontario railway from Moose Factory consisted of 8,000 pounds of furs, valued at \$160,000, Premier George S. Henry was informed.

Mexico believes that Canada should be invited into the Pan-American Conference, Jesus Silva Herzog, chairman of the Mexican delegation to the Pan-American Commercial Conference, stated at Washington.

Germany's "grand old man," President Paul Hindenburg, recently observed his 84th birthday anniversary on October 2 in physical health and mental vigor which he attributes to hard work and plain living.

William Bright, a member of the expeditionary force sent to the relief of General Gordon, when he was besieged at Khartoum and at one time batman to Lord Kitchener, died recently at Yattendon, England.

The first automobile made and sold in the United States was a Winton. The date of the first sale was March 24, 1898. It is now among the relics at the Smithsonian Institution at Washington, D.C. The top and body are the same as a buggy or phaeton.

Sir Robert Hamilton, member of Parliament for Orkney and Shetland, has been appointed chairman of the Colonial Advisory Council of Agriculture and Animal Health, in succession to Dr. Drummond Shiels, it was announced. Sir Robert is under-secretary for the colonies.

Vegetables From Manitoba

Fresh vegetables from the farms of Manitoba, which are to be used in England for exhibition purposes by the Federal Department of Agriculture, were shipped by the S.S. Ascania from Montreal. The display is fully representative of the vegetables produced by Manitoba farmers and occupies some 50 cases.

Air Space For Health

The ideal for health is at least 1,000 cubic feet of space for each individual. This means for example that a room ten feet long, ten feet wide and ten feet high provides the right amount of air space for one person. Of course, there must be constant and adequate ventilation as well.

Praises Famous Vegetable Pills For Indigestion

"Having been troubled with indigestion and Sick Headaches for several months, I was recommended to try your famous Pills. After the first dose I was made aware of their very real tonic value."—Miss M. C. Crockett.

"Dr. Carter's Little Liver Pills are no ordinary laxative. They are all vegetable and have a very definite, valuable tonic action upon the liver, exactly what you need to end Constipation, Acidity, Bilemness, Headaches, Poor Complexion, etc. All druggists, 25c and 75c red packages."

W. N. U. 1913

Pensioners Lose Out

Drop in British Pound Sterling Works Hardship On Imperial Pensioners

The Dominion headquarters of the Canadian Legion has made a strong protest to the British Ministry of Pensions regarding the loss being sustained by Imperial pensioners in Canada as a result of the drop in value of the pound sterling.

The British ministry representative at Ottawa has been instructed by the home government, the Legion, has been informed, to continue to pay pensions in sterling, which means that the pensioner has to bear the loss in exchange.

Major J. R. Bowler, Dominion general secretary of Legion, sent the following telegram to British Empire Service League, headquarters in London, England:

"Drop in exchange causing grave additional hardship to thousands of Imperial pensioners in Canada."

"Will the B.E.S.L. after conferring with other member organizations, make representations to have pension payments stabilized at the equivalent of par, \$4.86?"

A similar communication has also been sent by Major Bowler to the British ministry representative at Ottawa.

Turner Valley Gas

Experimental Plant For Extraction Of Benzene Nearing Completion

The experimental plant for the extraction of benzene and other by-products from Turner Valley gas is nearing completion at the Institute of Technology, Dr. E. H. Boomer, associate professor of chemistry, told a meeting of the Oil and Gas Association recently. He explained that about 500 feet of gas per hour will be used at the new plant, from which half a gallon of benzene will be extracted.

FARM MANAGER

A. J. Clark, farm manager, in Melita, Manitoba Zone.

Farm Management Program

Colonization Finance Corporation Of Canada, Limited, Operating In Manitoba and Eastern Saskatchewan

With the appointment of A. J. Clark, to the position of farm manager in the Melita, Manitoba zone, the Colonization Finance Corporation of Canada, Limited, completes its farm management programme in the province of Manitoba and eastern Saskatchewan. More than 400 farms in this area are now under expert management and cover an agricultural district approximately 170,000 acres.

Mr. Clark, who was born in Montreal, came to Manitoba as a child with his parents. His natural aptitude for agriculture took him to the Manitoba Agricultural College from which he was graduated in 1917, with honours in animal husbandry. He shortly became attached to the livestock branch of the Saskatchewan government, where he remained as purchasing agent until 1926, his duties taking him not only over western Canada but through both Ontario and Quebec. Since 1926 he has been on his own farm at Stonewall, Man., where he has specialized in pure bred shorthorn cattle and Yorkshire swine.

With Frank W. Reinhold as chief farm manager, the following six have been stationed by the Colonization Finance Corporation, Mr. Clark taking over his new duties immediately: Russell W. Coward, Winnipeg zone; H. J. Siemens, Brandon; A. E. Judson, Dauphin; W. J. McLeod, Moosomin; A. J. Clark, Melita, and George H. Jones, Portage la Prairie.

Bees Swarm In London

Three Swarms Invaded Busy Metropolis In One Day

Each summer a swarm of bees is sure to take possession of the busy street of some city; but it is not often that three swarms arrive on the same day. That, however, happened to London.

One swarm chose King Street, Hammersmith, and flew round buses and street cars in clouds before settling on a tree; the police taking charge of the tree and barricading it. The second swarm chose the roof of a house in Shepherd's Bush; and the third chose the window-sill of a flat in Bayswater.

Canada's Oldest Tunnel

The Canadian Pacific Railway tunnel under the Town of Brockville, Ontario, was opened Sept. 16, 1854, 77 years ago. At that time the tunnel, built under great difficulties, was owned and operated by the Brockville and Ottawa Railway, later absorbed by the Canada Central Railway, and finally by the Canadian Pacific. It is said to be the oldest railway tunnel in the Dominion, and trains still pass through it daily.

Exploring Mystery Of Easter Island Images

New Jersey Millionaire Taking Scientists To South Seas

A yacht, reputed to have cost more than \$1,500,000, loaded its shining white hull into Glen Cove Harbour, New York, to be made ready for a trip to Easter Island, where 20 scientists will attempt to solve the mystery of a "lost civilization." The island is in the Polynesian group in the South Pacific Ocean.

Since the discovery of the island on Easter Sunday, 1722, by the Dutch Admiral Roggeveen, there have been various indications of existence of a past culture.

The expedition of Eldridge R. Johnson, of Moorestown, N.J., will try to determine, among other things, who carved and erected huge stone statues on the island; who made the wooden images, found in profusion there; and what feats of engineering were required to move the stone images, some of them weighing many tons.

Huge blocks of stone form the walls surrounding some of the cities, and the origin of the stone is a mystery. Prof. MacMillan Brown, of Christ Church, N.Z., 12 years ago found carved alphabetical characters.

Mr. Johnson has long been interested in scientific exploration, but has not yet made public the names of the scientists who will make the expedition.

Aerial Photography

Speed and Vibration Make Fast Lens A Necessity

In the camera equipment for aerial mapping operations as carried on by the Topographical Survey of the Department of the Interior through the co-operation of the Royal Canadian Air Force, a fast lens must be employed, as not only must the speed of the aeroplane be taken into account, but also any vibration that may occur to the camera which is mounted in the plane does not eliminate. As a general practice, lenses working at a maximum aperture equal to one-quarter of its focal length, are employed. Lenses of this speed and having a fairly large covering power are now obtainable. To further speed up the action of the camera, the aerial photographic record, the emulsion with which the photographic film is coated, is especially prepared by the manufacturers so as to be supersensitized to the image-forming rays of light.

Trappers Go North

Better Explored That Coming Season Will Be Good For Beaver

Manitoba trappers are leaving for the north in large numbers to prepare for the winter season.

Many have gone up along the Bay Coast, while others will be confining their work to the inland areas. White, red, silver and cross fox will in most cases be sought by the men, while wolf, mink, otter, marten and beaver will, according to indications, be caught in lesser quantities. A considerable number of trappers are located in the James Bay coastal regions, some in the neighborhood of Severn and York Factory.

According to indications, the men say the coming season will be good for beaver.

To Solve World Troubles

Noted British Author Says World Should Be Declared Bankrupt

H. G. Wells, noted British author, has formulated the following prescription for the ills of the world: The world should be declared bankrupt and its debts written down.

The issuance of money should be restricted to one central world authority.

War should be abolished and all foreign offices, diplomatic services, arsenals, dockyards, war offices, navies and air-forces scrapped, disbanded and pensioned.

The earth should be ruled by a dictatorship, not of this man or that man, but of informed and educated common sense.

Motor Vehicles In Canada

There were 1,239,886 motor vehicles registered in Canada at the end of 1930, an increase of 44,249 over the total registration of December 31, 1929. The "automobile density" of Canada is one motor vehicle for every eight persons in the Dominion.

"Husbands," said an old Scottish woman, "are verra like teeth. They're mighty hard to get, an' they're a deal o' trouble to the time ye're in them, but they leave an awful blank abint them when they're gone."

Employer: What we want is a smart boy, alert and intelligent. Are you quick to take orders?
Boy Applicant (proudly): Yessir—ad it twice in a fortnight once!

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE?—Late one afternoon, while on board the freighter "Madrigal" in the Chinese sea, Captain Jimmy and his friends sighted a hand-built ship lying on a little vessel. They took off to the rescue in their plane.

As we drew nearer, through the twilight, we could plainly see the flash from the guns of the little gun boat. I saw our plane over the top of the gun, and she roared down toward us. The scene of battle at a tremendous rate.

Suddenly the firing seemed to cease. A lucky shot must have crippled the ship they were pursuing. Quarter of a mile away and we nosed down to get a better view of what was taking place.

A little ship lay over with a heavy list about below the water line. A large Chinese junk was tied behind and a board of party of natives swarmed all over the captured vessel. The passengers were here and there, looking for shelter. Then as we came near we could see a number of figures to the rail of the evidently white men and ship officers.

As we passed overhead, the pirates greeted us with a volley, but they were not used to firing at a speeding plane, and their shots went wide.

We swept past the boats at about one hundred and ten miles an hour. The Chinese junk was our target and how long we longed for a few more shells. Something of a machine gun! Still, we had the shot gun and plenty of buckshot shells, and could make it hot for those pirates.

About half a mile away, I turned to the attack again. Suddenly I swooped until it seemed as if we would scrape the decks as we passed. Every bit of engine power forced us out of the sky. Our speed was tremendous. It must

have been a fearful sight to see a plane making such speed straight at one. In the heat of the junk stood a group of pirates—puffed. Then, Haul! Bang! roared the heavy shot gun, and the pirates seemed to flinch, but several seemed to stand and lay quite still.

A few stray shots scattered by, fired by the more courageous of the pirates who dared show themselves above decks. Meanwhile, my gunner loaded up his heavy artillery ready for his next attack. Again we swooped and raked the decks with buckshot, but this time the pirates had seen enough of us. Someone cut the junk loose and the pirates rushed back and crowded on full sail. Now was our chance.

Circling around to gain altitude, we suddenly dove straight for the pirates' shot guns. The whinnings of the junk had all but been do at best, to hold the ship in her course, for a first wind had suddenly sprung up and she leaned heavily to one side.

Then, looking up, he caught sight of us hovering above him like a great bird of prey. Just as a charge of buckshot rattled around him on the decks. With a yell, he let go the wheel and died, and the next moment a strong gust of wind heeled the junk over on her side. The last we saw of her, she seemed to be a ball of fire.

Water. Whether the shore of the junk was still in a flaming state, is doubtful.

Meanwhile we streaked back toward the little ship. The whinnings of the junk were still in the air. Then a flash of red light. There, there—those villains had set her afire.

NOTE: Any of our young readers writing to "Captain Jimmy" 2910 Star Building, Toronto, will receive his signed photo free!

Recipes For This Week

(By Betty Barclay)

TOMATO CHUTNEY

2 dozen ripe tomatoes, medium size, chopped.
6 onions, medium size, chopped.
3 red peppers, seeded and chopped.
1 dozen tart apples, peeled and chopped.
1 pound seedless raisins.
1 cup celery, cut fine.
2 quarts vinegar.
3 cups sugar.
Salt.
1 teaspoon each cinnamon, nutmeg and cloves.
Combine the ingredients, and cook in a preserving kettle until the chutney is thick and clear. Stir frequently to prevent burning. Pour into hot, sterilized jars and seal.

GENOISE CAKE

1 1/2 cups sifted cake flour, sifted.
1 1/2 cups butter.
1 cup powdered sugar.
1/2 teaspoon lemon extract.
4 eggs, well beaten.
Sift flour once, measure, add baking powder, and sift together three times. Cream butter thoroughly until light and fluffy. Add flavouring. Add eggs, alternately with flour, a small amount at a time, beating well after each addition. Turn into greased, paper-lined pan 8 x 8 x 2 inches. Bake in moderate oven (350 degrees Fahrenheit) 50 minutes.

Customer—What's this in my soup?
Waiter—Don't ask me, sir, I don't know one insect from another.

May Float Domestic Loan

Rumour That Loan May Be Floated Within Next Few Months

A despatch from Ottawa to the Montreal Star says:

"A domestic loan in Canada looms up as a possibility in a few months. Conditions for borrowing in the United States, if such were the purpose, are not propitious and, in any event, plenty of funds will be available in Canada without encountering the adversities of exchange."

Any loan which is floated would be primarily to bear the cost of those undertakings designed for the relief of unemployment, but it could be applied to other purposes as well, and probably would be.

"The amount of flotation will be determined in the light of final estimates of requirements, but general revenue conditions clearly suggest that it will be fairly bulky."

Tommy—"Papa, didn't you tell mamma we must economize?"

Father—"Yes, I did."

Tommy—"Well, I was thinking that if you got me a bicycle I would not wear out so many shoes."

Children's Colds Best Treated Externally

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FEDLER
Author of
"The Splendid Folly," "The Hermit of Folly,"
Hodder & Stoughton, Ltd., London.

CHAPTER III.—Continued

"I fear I seem intrusive. But I am so interested in your future—I have taken a great fancy to you, mademoiselle. That must be my excuse." She rose from the table, adding smilingly: "At least you will not find it dull, since Lady Anne has two sons. They will be companions for you."

Jean rose, too, and together they passed out of the salle a manger. "And what do you propose to do with yourself today?" asked the Countess, pausing in the hall. "My husband and I are going for a sleigh drive. Would you care to come with us? We should be delighted."

Jean shook her head. "It's very kind of you. But I should really like to try my luck on the ice. I haven't skated for some years, and as I feel a trifle shaky about beginning again, Monsieur Griolet, who directs the sports, has promised to coach me up a bit some this morning."

"But," Madame de Varigny nodded pleasantly. "You will be well occupied while we are away. Au revoir, then, till our return. Perhaps we shall walk down to the rink later to witness your progress under Monsieur Griolet's instruction."

She smiled mischievously, the smile irradiating her face with a sudden charm. Jean felt as though, for a moment, she had glimpsed the woman the Countess might have been but for some happening in her life which had soured and embittered it, setting that strange implacability within the liquid depths of her soft, southern eyes.

She was still speculating on Madame de Varigny's curious personality as she made her way along the

Keep on your Feet

4 MORE ACTIVE DAYS

It's Always a "TRYING TIME"

YOU don't have to be polite with your mother. She understands. This is always a "trying time". But there's no excuse for needless suffering.

Watch the calendar... and a few days before... start taking Lydia E. Pinkham's Vegetable Compound. It peeps you up... calms your nerves... makes you feel so much better.

Just ask for Lydia E. Pinkham's new tablets... at any drug store. Buy them without conversation or embarrassment.

Lydia E. Pinkham's VEGETABLE COMPOUND

W. N. U. 1911

beaten track that led towards the rink, and then, as a sudden turn of the way brought the sheet of ice suddenly into full view, all thoughts concerning the bunch of contradictions that goes to make up individual character were swept out of her mind.

In the glory of the morning sunlight the stretch of frozen water gleamed like a shield of burnished silver, whilst on its further side rose great pine-woods, mysteriously dark and silent, climbing the steeply rising ground towards the mountains.

There were a number of people skating, and Jean discerned Monsieur Griolet in the distance, supervising the practice of a pretty American girl who was cutting figures with an ease and exquisite balance of lithe body that hardly seemed to stand in need of the instructions he poured forth so volubly. Probably, Jean decided, the American had entered for some match and was being coached up to concert pitch accordingly.

She stood for a little time watching with interest the varied performances of the skaters. Bands of light-hearted folk, indulging in the sport just for the sheer enjoyment of it, sped gaily by, broken snatches of their talk and laughter drifting back to her as they passed, whilst groups of more accomplished skaters performed intricate evolutions with an earnestness and intensity of purpose almost worthy of a better cause.

Jean felt a little stranded and forlorn. She would have liked someone to share her enthusiasm for the marvelous achievement by the figure-skaters, and to laugh with her a little at their deadly seriousness and at the scraps of heated argument anent the various schools of technique which came to her, borne on the still, clear air.

Presently her attention was attracted by the solitary figure of a man who swept past her in the course of making a complete circle of the rink. He skinned the ice with the free assurance of an expert, and as he passed, Jean caught a fleeting glimpse of a supple, sinewy figure, and of a lean, dark face, down-bent, with a cap crammed low on to the somewhat scowling brows.

There was something curiously distinctive about the man. Brief as was her vision of him, it possessed an odd definiteness—a vividness of impression that was rather startling.

He flashed by, his arms folded across his chest, moving with long, rhythmic strokes which soon carried him to the further side of the rink. Jean's eyes followed him interestedly. He was unmistakably an Englishman, and he seemed to be as solitary as herself, but, unlike her, he appeared indifferent to the fact, absorbed in his own thoughts which, to judge by the sudden broadening of his face, were not particularly pleasant ones.

Soon she lost sight of him amid the scattered groups of smoothly gliding figures. The scene reminded her of a cinema show. People darted suddenly into the picture, materializing in full detail in the space of a moment, then rushed out of it again, dwindling into insignificant black dots which merged themselves into the continuously shifting throng beyond.

At last she bent her steps towards the lower end of the rink, by common consent reserved for beginners in the art of skating. She had not skated for several years, owing to a severe strain which had left her with a weak ankle, and she felt somewhat nervous about starting again.

Rather slowly she fastened on her skates and ventured tentatively on to the ice. For a few minutes she suffered from a devastating feeling that her legs didn't belong to her, and wished heartily that she had never quitted the safe security of the bank, but before long her confidence returned, and with it that flexible ease of balance which, once acquired, is never really lost.

In a short time she was thoroughly enjoying the rapid, effortless motion, and felt herself equal to steering a safe course beyond the narrow limits of the "Mugs Corner"—as that portion of the ice allotted to novices was unkindly dubbed.

She struck out for the middle of the rink, gradually increasing her speed and reveling in the sting of the keen, cold air against her face. Then, all at once, it seemed as though the solid surface gave way beneath her foot. She lurched forward, flung violently off her balance, and in the same moment the sharp clink of metal upon the ice betrayed the cause. One of her skates insecurely fastened, had come off.

She staggered wildly, and in another instant would have fallen had not someone, swift as a shadow, slipped a supporting arm round her waist, skated smoothly beside her, little by little slackening their mutual pace until Jean, on one blade all this time, could stop without danger of falling.

As they glided to a standstill, she turned to offer her thanks and found herself looking straight into the lean, dark face of the Englishman who had

Take It Now

Keep strong the Winter through

SCOTT'S EMULSION

of Norwegian Cod Liver Oil

Builds Resistance Easy to Take

passed her when she had been watching the skaters.

He lifted his cap, and as he stood for a moment bareheaded beside her, she noticed with a curious little shock—half surprised, half appreciative—that on the left temple his dark brown hair was streaked with a single pure white lock, as though a finger had been laid upon the hair and bleached it where it lay. It conferred a certain air of distinction—an added value of contrast—just as the sharp black shadow in a neutral-tinted picture gives sudden significance to the whole conception.

The stranger was regarding Jean with a flicker of amusement in his grey eyes.

The stranger was regarding Jean with a flicker of amusement in his grey eyes.

"That was a near thing!" he observed. Evidently he judged her to be a Frenchwoman, for he spoke in French—very fluently, but with an unmistakably English accent. Instinctively Jean, who all her life had been as frequently called upon to converse in French as English, responded in the same language.

She was breathing rather quickly, a little shaken by the suddenness of the incident, and his face took on a shade of concern.

"You're not hurt, I hope? Did you twist your ankle?"

"No, oh, no," she smiled up at him. "I can't have fastened my skate on properly, and when it shot off like that I'm afraid I rather lost my head. You see," she added explanatorily, "I haven't skated for some years. And I was never very proficient."

"I see," he said gravely. "It was a little rash of you to start again quite alone, wasn't it?"

"I suppose it was. However, as you luckily happened to be there to save me from the consequences, no harm is done. Thank you so much."

There was a note of dismissal in her voice, but apparently he failed to notice it, for he held out his hands to her, crosswise, saying:

"Let me help you to the bank, and then I'll retrieve your errant skate for you."

He so evidently expected her to comply with his suggestion that, almost without her own volition, she found herself moving with him towards the edge of the rink, her hands grasped in a close, steady clasp, and a moment later she was scrambling up the bank. Once more on level ground, she made a movement to withdraw her hands.

"I can manage quite well now," she said rather nervously. There was

ACID STOMACH

EXCESS acid is the common cause of all results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless and tasteless, and yet its action is quick. You will never rely on crude remedies once you learn how quickly this method acts. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior toothpaste that safeguards against acid-mouth. (Made in Canada.)

something in that strong, firm grip of his which sent a curious tremor of consciousness through her.

(To Be Continued.)

Bedouin Given Credit Of Inventing Alphabet

Chicago Professor's Idea Upsets Theory Of Many Scholars

Some unknown Bedouin mine foreman, working for the ancient Egyptians, about 1,800 years before Christ, is credited by Prof. Martin Sprengling, of the University of Chicago, with inventing the A, B, C. The mine foreman, puzzled by the complex hieroglyphics of his masters, sought a shorter way to keep his records, and simplified his work by developing a rudimentary alphabet. In the opinion of Prof. Sprengling, He based his theory on his translation of the Sinal inscriptions, found in 1904 by Sir Flinders Petrie, in Sinal, which lies between Egypt and the northern part of Arabia. His theory would upset that of many scholars who have attributed the development of the alphabet to the Phoenicians.

Must Be Good Fighters

French Scientist Wants To Raise Race Of Super-Cats

The production of a race of "super-cats" capable of driving all mice and rats from any city in France was forecast by Dr. Jean Loir, distinguished scientist and nephew of the famous Pasteur.

Dr. Loir said he was developing the cats at Havre where secret tests have made devastating inroads on rodents, some as large as small dogs, along the wharves.

Dr. Loir is seeking cats with a highly developed sense of smell and with fighting ability. Most of the animals with which he has experimented so far have been remarkable for the length of their whiskers.

Edouard Herriot, mayor of Lyons, has invited Dr. Loir to go to that city where special facilities would be accorded him for further experiments.

Famous Wills Kept In Somerset House

Can Be Inspected On Payment Of Small Fee

Storage accommodation at Somerset House, London, England, where wills, birth, death and marriage certificates, and divorce documents are filed, has for many years been severely taxed. The position has now been eased by the preparation of a new strong-room below the level of the Embankment, capable of holding ten million additional papers. Some of the wills date back to 1382. Among the collection are those of Shakespeare, Nelson, Wellington, Pitt, Burke, and Dr. Johnson. All these can be seen for a fee of 1s., except that of Shakespeare, for an inspection of which 2s. is charged. Altogether it is estimated that Somerset House contains fifty million documents.

Douglas' Egyptian Liniment is recommended for sore necks, galls, distemper, callosities and sprains. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

French Laboratory Making Experiment

Trying To Acclimatize Trees Which Produce Fluid Like Milk

An experiment with trees that produce milk and cream is being conducted by an important French laboratory.

Several living trees of the family "Brosimum Galactodendron" were brought to France from South America, and work has been started to acclimatize them to northern European conditions. The trees, when punctured, will provide a sweet fluid like milk. It does not turn sour, and laboratory tests show that it is richer than cow's milk in phosphates and sugar. It looks and tastes much like the real product and is produced at 65 per cent. of the cost of ordinary cream.

Cheese Curing During Fall Months

Dr. J. A. Rudwick, Dominion Dairy Commissioner, calls attention to the importance of maintaining adequate temperatures for the curing of cheese made during the fall months, particularly October and November. The temperature of the curing rooms should never be allowed to go below 60 degrees Fahrenheit, and the cheese should be turned every day. A fire in the curing room keeps the air drier and gives the cheese better rinds while maintaining adequate temperatures.

The Blue Nile in Africa was so called from the dark colour of its salt-laden waters.

Millions in money can make a man miserable if that is all the treasure that he lays up.

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

A Cherished Record

Mother Keeps Safely Only Link With Dead Son

With millions of dollars stored away in the vaults of one of Washington's largest financial institutions, it will naturally surprise one to learn that a cracked phonograph record, held for safe keeping there, is "the most precious thing" under lock and key. And why shouldn't it be? Listen what the head of the bank related interestingly the other day, when he looked up from his desk only to see standing before him a little old woman, dressed in black. Placing a round package on the desk he said she told him—"Please, I want this put away where it will be safe. It is very precious to me." Further inquiry revealed, the banker said: "In 1917 he: son, a singer in a local cabaret, marched away to war and stayed in Flanders Field. One of the things she had to remember him by was a phonograph record which he had made before he left. It was old and scared now, and had a crack in it, but his voice, singing one of the numbers he had sung at the cabaret, was still recognizable. It was the record she wanted to preserve. And now, once a year, on her son's birthday, the banker said, the little old woman comes to the bank and takes home the record."

Little Helps For This Week

"Trust in Him at all times."—Psalm lxxi, 8.

I know not what my life shall hold Of love or light, Only that safe within the fold It shall be right.

I only seek to find the ways His feet have pressed; And feel through fair or darker days He knoweth best.

—M.M.B.

Whatever our needs, He can supply them, for He is love. Only let us believe, and our joy and blessedness shall be full. Let us honour God by trusting Him entirely. Let us be as willing to receive as He is to bestow.

—Thorold.

Patient Was Hypnotized

Introducing New Method Of Painless Dental Operation

The Brooklyn Eagle has reported a bloodless and painless dental operation with hypnosis replacing anesthetic. The paper said the experiment was witnessed by its own science editor in the offices of Dr. A. J. Bruchlacher, Brooklyn dentist.

Walter L. Orton, mechanical engineer and vice-president of the Brooklyn Psychic Research society, kept a woman whose name was given only as "Miss M. C." under hypnotic influence for 15 minutes, the paper said, while Dr. Bruchlacher extracted a tooth, made an incision in a gum and cut away a growth of bone.

THE RHYMING OPTIMIST

By Aline Michaels

BY TIME UNSTAINED

This is the greatest love, the love that lives Unchanged by changing time and circumstance, That still a portion of its glamour gives

To touch with peace each whim Of madcap change and chance.

It lends to life's adventure, strange and long,

Always a blessing by naught else conferred;

It is the sweetness lingering after song.

The hidden meaning of the spoken word.

No part in it have years, for it may be

The treasure of the heart from youth to age,

Or but an hour's sudden ecstasy, Obliterated by life's turning page.

The fair ideal, desired and unattained, This is the only love by time unstained.

As a verifuge an effective preparation is Mother Graves' Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

Hydro Development

Total water-power installations in Canada have grown from 71,515 horse-power in 1890 to 6,125,012 horse-power at the beginning of 1931.

Over 85 per cent. of the present installation is installed for general distribution by central electric station organizations.

The bachelor remains unmarried by keeping out of arms' way.

Good has but one enemy, the evil, but the evil has two enemies, the good and itself.

A man's good judgment usually shows up the day after.

The most peaceful place in which to live is within one's income.

Suffered Severe, Painful Cramps In Her Stomach

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes:—"I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

J. C. McFarland Co.

IRMA, Alberta

Since 1923 the Searle Grain Company, in virtue of its contract with the Alberta Pool, has each year satisfactorily handled farmers' POOLED GRAIN.

Farmers may now sell on the OPEN MARKET.

Twenty-five years of experience with this system of marketing enables the Searle Grain Company to return to all former and new customers the utmost possible SPOT CASH for all grains.

The Searle Grain Company Limited

340 COUNTRY ELEVATORS

Calgary, Edmonton, Winnipeg, Vancouver, and Fort William

For the Successful handling of your Grain —
SEE W. COLE, Agent.

Main Street

Mr. W. H. King went to Edmonton to bring his grandson, Junior, back after undergoing an operation.

Mr. F. Peterson was a visitor to the city Tuesday.

Mrs. Bothwell went to her home at Islay for the holiday and has been unable to return on account of illness.

Mrs. A. Carbol and Miss Dorothy Drummond motored to Edmonton for a week's visit with friends there.

Mrs. J. M. Seaton of Edmonton was a visitor in Irma and Sunny Brae over the week end, the guest of Mr. and Mrs. F. Watkinson.

We would like to remind you that the Ladies Aid Bazaar is just two weeks off — November 7th.

The Dramatic Society is well away with their annual play "Her Honor the Mayor," and hope to present it about November 27th.

Mr. and Mrs. Darrel Peterson are the proud parents of a fine baby boy, arriving on October 20th at the Viking hospital.

The Women's Institute shipped a car of potatoes and vegetables, to Chinook for relief purposes. No trouble was experienced in receiving donations from the wonderful gardens in the Irma district.

The Irma W. M. S. held the October meeting at the Massey. There was a good attendance and Dr. Scrimgeour's address was a real treat. The treasurer's report was very gratifying as it showed we are gradually reaching our objective and hope to go well over the top. The W. M. S. is growing nicely in membership too, adding two or three new members at the meeting.

The November meeting will be held at the home of Mrs. and Miss Flewelling. Irma is fortunate in having such facilities for farmers to market their grain. We have four elevators, each of which spend a large amount of money in the district, helping to support the community with taxes, salaries, etc.

These elevators are in a position to render the most efficient service to shippers of grain and due to the long experience of the buyers they are able to give the soundest advice to shippers which reflects in the highest prices received by shippers for their grain. Farmers would be well advised to make use of these facilities when disposing of their grain.

AVONDALE NEWS

Mr. and Mrs. Timbers and three grand children of Edmonton, and Mr. and Mrs. Wm. Riddell and son Claire of Vegreville, spent Thanksgiving holiday with Mr. and Mrs. Shotts and also took in the sights of Wainwright Buffalo Park. Mr. Riddell is a brother of Mrs. Shotts.

Mrs. Marshall visited Mrs. Whitey on Wednesday of last week.

Will all the J. U.F.A. members who still have sewing for the crippled children's hospital try to send it in as soon as possible so we will have it to send away with the rest.

The next W. A. meeting will be held at the home of Mrs. George Higginson on Tuesday, October 27th at 2:30 p.m.

JARROW

A number from here attended the chicken supper and concert at Kinsella on Monday night and all report a good supper and an extra good concert. We promise all those who attend the chicken supper and concert here on November 6th almost as good.

The Ladies Aid will meet at the home of Mrs. Boyd on Wednesday afternoon, October 28th to perfect their plans for the supper and concert. All ladies invited to attend.

Mr. and Mrs. C. A. Jenkins and little daughter Colleen of Lavoxy visited at Mr. and Mrs. H. H. McDougall's this week-end.

Mrs. McCracken returned on Saturday from a week's visit in Viking with her niece Mrs. P. Lindquist. Gladys Meakins who has been in Lougheed for the summer returned home last week.

Eileen Meakins spent a few days at her home here before going to Viking where she has accepted a position in the Viking hospital.

Mr. and Mrs. E. S. Williams and family motored to Lamont on Saturday and visited with Mr. Williams' parents. They returned on Sunday.

Rev. Wilson of Edmonton visited with Rev. and Mrs. Taylor this week end.

On Sunday Thanksgiving services were held in the church. Rev. Wilson of the home mission board was the speaker. The music was furnished by Mr. Kerns, Mrs. Williams, Mrs. Garvie and Miss Kjosness, of Kinsella and was thoroughly enjoyed by all present. The church was nicely decorated and we are sorry there was not more present to enjoy and profit by this splendid service.

Mr. and Mrs. O. Marbury, Mrs. R. Marbury, Miss W. Matthews and baby and Mrs. Orr visited at Mr. and Mrs. Ralph Morby's at Viking on Tuesday.

THE MAIL BOX.

(The editor of The Times does not necessarily endorse and is not responsible for the views expressed by any contributor.)

Dear Editor—

I am one of those who much appreciated the Rev. Mr. Bainbridge's articles on "Communism" and have only been waiting for more, to say so.

I wonder if everyone appreciates just what it means to have such men as Mr. Bainbridge, Rev. Priestley of the U. F. A., and other churchmen in line with modern thought, and in sympathy with the working classes. Looking back one will see that in all revolutionary times the clergy were a great stumbling block, so much so that to be socialistic or communistic became almost synonymous with atheistic. In the French revolution the opposing classes and the clergy were humped by the oppressed because of their unity. The Russians found the same to be true, and I believe, the Spanish. This is not true only of one or two sections of the Christian Church. At the time of the American Civil war the clergy of the South thundered from the pulpits in favor of slavery, as Jack London so ably relates it in his "Iron Heel." We all remember how piously Tom Sawyer was brought up and how conscientious-stricken he was at helping an escaping slave.

Many other instances, of course, could be cited of the Christian clergy taking what some of us consider, the wrong stand. It is not to their discredit, in a way; they were merely a product of their times and played "safe". So, as I have said, it is great to have some of the modern clergy a little ahead of their time and bearing the banner of Christ in the midst of the class that He Himself fraternized with.

Things have not changed so very much since He walked the earth. The rich still observe the letter of the law, but they still fail to react when the diagnosis of their case is made and the prescription given, "Sell all that thou hast and give it to the poor." The little children are still piously taught to sing:

"Not more than others I deserve
Yet God has given me more;
For I have food while others starve,
And beg from door to door."

In other words, if evolution be true, we have never "evolved" very far past the hog age; the bristles show through. The manner may be gentle, the voice soft, the speech perfect, the life moral, but loving your neighbor as yourself has never really become fashionable or popular. The grab, to amass, to get into the trough and wallow, while others want, is necessary to all this thing, it seems, so it is done, beyond all bounds.

Capitalism, the present system of things, allows all this. The working man, even if he can get work, is ground through the industrial mill and "junked" at fifty. Might not the country just as well have the benefit of his work up until fifty as some capitalists since he has to be looked after by the country from fifty to his death. In the train of capitalism, (money by any means, no matter how it is got) all the evils are engendered; wars, to protect their investments; the liquor traffic, white slavery, wage slavery; highway robbery and murder are some of the by-products.

So, instead of waiting for the rich young men and the rich old men to have a change of heart and "divvy" up, a certain element of the people contemplate a change in the system of things. Any change would be an improvement. The nation has to look after the unemployed, the old, the young, almost everything, so that they may as well take over the whole business, and take a fresh start with no handicaps, no protected classes. Just kick over the sand piles, little and big, like little children playing at the beach, and start a new game—we all know the rules! It could all be done in a most Christian and bloodless manner—and leave the "hog" age, for one more advanced.

Yours truly,

Fabyan, Alta. A. Armstrong.

WANT ADS

WANTED—A piano to rent. Inquire at Post Office.

WANTED—Some good clean jam tins free from labels or printed matter. — H. W. Love, Irma.

STRAYED—From Section 23-45-9-10, an Aberdeen-Angus Bull, branded TS on left neck. Weight about 1,600 lbs., age about 1-2 years. Anyone seeing same kindly notify Thos. W. Shaw, Irma, Alta.

FOR RENT—Two room house, opposite Farmers Mutual Lumber Co., in good condition. Rent \$7.00 per month in advance. — H. W. Love, Irma.

MAJOR STRANGE HOLDS MEETING AT IRMA

If some of the optimistic predictions made by Major H. G. L. Strange, of Winnipeg, at a meeting held at Irma on Wednesday evening are borne out in the final analysis, wheat growers are in a fair way to be in a much better position soon through better prices.

A very illuminating and instructive address was given by Major Strange to a gathering of attentive listeners. Some of the salient features of it were that wheat prices are bound to continue to reach up to better price levels; the spread of some ten cents between No. 1 and No. 3 wheat was justified by the competitive demands of foreign buyers; the price of No. 3 was not too low, but the heavy demands and bids made for No. 1 were too high, when the world's supply, carryover, etc., are taken into consideration.

Many explanations were made in the address and in reply to questions asked as to the standard on which wheat is graded, the inadvisability of mixing grades at the elevators, the fairness of inspections which are government controlled and the great need for Canadian wheat to hold its present status as to high quality for blending purposes in the making of bread in foreign countries. He urged the planting of better seed and better methods of farming.

Major Strange's talk was a great encouragement to those needing it at this time and will result in a broader outlook for those who heard him that the plight of the farmer is perhaps not quite as ominous as it might appear. He stressed the point that those on the farm have plenty to eat, a place in which to live and at least some of the comforts which, through depression, are not enjoyed by those living in the towns and cities.

According to the speaker there is no question but that prices are on the upward trend. Major Strange is no fireside farmer. He farms at least one thousand acres of land each year and in his travels over the country in the interests of the Searle Grain Co., should be in a position to tell of conditions generally on the farm with a certain degree of reliability. What he had to say will bolster up the courage of farmers at a time which is opportune.

A PLEASANT SURPRISE

A very pleasant event took place at the home of Mrs. James Fenton when Miss Clara Sellars a bride of next month was the guest of honor at an afternoon tea and shower. The rooms were nicely decorated with wedding bells and pink and white streamers, and the tea table was centered with brides cake.

After taking part in a contest "A Vegetable Roman" Miss Sellars was blindfolded and led into the room where she was surprised to find a barrel of lovely gifts from all her Sunny Brae and old time friends, waiting to be unpacked.

During the tea hour Mrs. C. F. Hill, Mrs. F. M. Higginson and Mrs. P. J. Hardy assisted, and others present included: Mrs. E. M. Hill, Mrs. T. Sanderson, and Miss Lily, Mrs. M. D. Aikin, Mrs. D. Bacon, Mrs. O. Enger, Mrs. M. Enger, Mrs. G. Knowles, Mrs. F. Watkinson, Mrs. J. N. Seaton of Edmonton, Mrs. E. Fenton, Mrs. J. Smart, Mrs. C. A. Mager, Stettler, Mrs. E. W. Carter, Miss Myrtle Fitzpatrick and Miss Rena Fenton.

The enjoyable afternoon was then brought to a close by all singing, "For She's a Jolly Good Fellow."

CARD OF THANKS

The Irma Women's Institute wish to thank those who so kindly furnished vegetables and assisted in loading the car for Chinook last week.

A Worn Out Tractor

Is a poor machine to try and get your crop threshed with. The Massey-Harris Co., have on hand some real Tractor Bargains. Think of it. Tractors that have only done one season's work and have been thoroughly overhauled in their own shop by their own workmen and repainted. Fully guaranteed and selling at from \$600.00 to \$800.00.

The real value of these Tractors is at least \$1,000. But they are being offered at this Exceptionally Low Price to clear the stock.

Better see your agent at once before they are all sold. V. HUTCHINSON, Blacksmith, Massey Harris Agent, Phone 12, Irma
